### LISTEN TO WHAT YOUR COLLEAGUES HAVE TO SAY ABOUT OUR SWEDISH SEATING SYSTEM...

*"Ergonomic seating is one of the most important tools that the dental team has to increase their own comfort and productivity. The ergonomic benefit of the RGP stool design is among the best I have seen in the industry. That, combined with the quality of the stools and the excellent customer support, makes RGP my top choice for seating for the dental team."*

-MARY GOVONI, CDA, RDH, MBA  
OKEMOS, MI

*"Without reservation the most ergonomic chair available. A back saving addition to my office."*

-DR. DANIEL FRIEDMAN  
SEATTLE, WA

*"In over 35 years of practice the RGP doctor's chair is the most comfortable chair I've been able to find. It is ergonomically designed, easy to use and very supportive for an aging back."*

-BERTRAND S. WEISBART, D.D.S.  
NEW HAVEN, CT

*"Prior to purchasing the RGP chair I had been using Adec chairs. I could never really achieve a comfortable position in those chairs while working. I was having perpetual lower back pain and discomfort in my right elbow (I am left handed). The RGP chairs provided everything they were presented to do. My lower back pain has completely disappeared now. I use the arm support for my right arm, and the joint pain I was experiencing is gone. The chairs are very easy to adjust, also. The dental chair is something I use every single day. The RGP chairs have tremendously increased the quality of my work day. It has been a very beneficial investment for myself and for my staff."*

-RAY CHRISTINE, D.D.S.  
KOKOMO, IN

*"For the past twenty-five years, I have had back problems due to poor back support while working at the dental chair. After using the doctors Swedish Seating System for the past two months, I have experienced a definite improvement in back support and diminishing of back discomfort."*

-LISTER C. LIBY, D.D.S.  
FLOSSMOOR, IL

# YOU SIT... WE FIT

**400-D ACCESSORIES**

**Relax Armrest**

**Hydro Armrest**

**Foot Ring**

The 400-D is the newest version of RGP's ergonomically designed operator stools, which combines unparalleled support with an elegant design. Its unique hydraulic mechanism is the core of the stool's ability to adjust to an individual's personal seating requirements. When set in "free motion", the back and seat of the stool will follow one's movement.

The backrest and the stool itself can

also be adjusted for height.

Available shoulder support system offers relief to the neck and back, while providing full range of motion for both arms. The patented "Relax" and "Hydro" Support Arms swing laterally side-to-side and telescope forward and back. The Hydro adds a third dimension through its tension-adjustable up and down motion.

**1** Twist the control lever backward to adjust the height of the stool.

**3** Adjust the height of the back rest by lifting the lever on the backrest upward. Push down to lock.

**2** Twist the lever forward to set the angle and position of the backrest and seat.

**THE RGP STRADDLE STOOL**

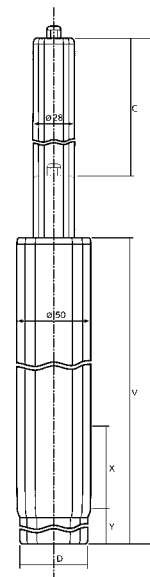

Available armrests require optional bracket

RGP is the leader in ergonomic seating solutions for medical professionals. Our doctor, hygiene and assistant stools have been helping promote good posture for over eleven years.

RGP stools are available in standard vinyl, Ultra-vinyl or custom material. Doctor stools can be covered in genuine leather. The support arms can be added in several different configurations.

RGP offers a thirty-day money-back guarantee on all products. There is a lifetime warranty on the mechanical components and a three-year warranty on other components.
