*RGP's ASSISTANT STOOL
with armrest, foot ring and
mid-long cylinder*

RGP's Assistant Stool

1 Lift the front control lever **up** to adjust the height of the stool.

2 Lift the rear lever **upward** to set the angle and position of the backrest and seat.

3 Adjust the height of the backrest by pushing the bar on the column to the left.

RGP's Assistant Stool incorporates the most effective ergonomic design ever offered in an operator stool for the dental assistant.

The adjustments available for the stool provide the user with the ability to conform the stool to their seating habits. These adjustments include stool height, backrest height, back rest position (forward and back) and seat tilt. The seat pan is molded to ensure proper positioning of the body,

providing the appropriate environment for a healthy back. The included assistant arm, mid-long cylinder and foot ring complete the package. The RGP Assistant Stool will enhance productivity and enable a healthy career.

RGP offers a thirty-day money back guarantee on the Assistant Stool. There is a lifetime warranty on the components of the seat, back and mechanism and a limited life-time warranty (see warranty sheet).
